

CHEMICAL UNIT

CONTINUOUS ADDITIVES
INJECTION UNIT

“Mix on the Fly” Technology

CE Certified Hydraulically Driven Chemical Additive System

CE Certified Electrically Driven Chemical Additive System

APPLICATIONS

- Chemical feeding to support fracturing operations
- Utilized for extreme climates from arctic to desert and tropical conditions

FEATURES

- Truck, trailer or skid mounted
- Built to European standards (optional)
- CE conformity (optional)
- Various configurations
- Insulated aluminum van body with dual swing out doors for loading totes
- Controlled and monitored from a control console
- Heated storage areas
- Various numbers of chemical tanks
- Various configurations of compartment tanks and totes
- Various numbers of hydraulically or electrically driven liquid additive pumps
- Various types of chemical pumps
- Automatic Chemical Control System (ACC) for liquid additives
- Agitation and circulation systems
- Built-in flushing systems

Chemical Blending Container

S/S Tanks

Hydraulically or Electrically Driven Dosing Pumps

GOES GmbH

German Oilfield Equipment & Services

Muenchener Strasse 32 • 29392 Wesendorf • Germany

- Pumps can be operated manually or automatically
- Pumps: progressive cavity pumps, gear pumps, rotary pumps and plunger pumps
- Self-recoiling liquid chemical additive hoses mounted at the rear of the van
- Hoses for liquid additives of various sizes
- Flow meters
- Laboratory facility
- Storage area for dry bulk material
- Remote control / data van control
