

DATA VAN

MOBIL DATA AQUISITION
AND CONTROL UNIT

Designing, Monitoring, Controlling and Analysing Fracturing

Typical Inside View

Touch Screen Frac Pump, Blender, CAS and Hydration Unit Controls

APPLICATIONS

Mobile unit to monitor, display, record and analyze the various pumping and well parameters. Used during fracturing, foamed cementing, acidizing and other pumping operations. Utilized for extreme climates from arctic to desert and tropical conditions.

FEATURES

- Truck, trailer or skid mounted
- Thermo isolated container
- Various power generator systems
- Built to European standards (optional)
- CE conformity (optional)
- Air conditioned job monitoring area
- Various number of cable reels and pressure sensors
- User friendly software for displaying and processing data
- High performance computer system
- Data is displayed in digital and graphic format
- Operational parameters are measured and recorded every second
- Computer equipped with an uninterruptible power supply to ensure no data is lost
- GOES Data Management System: various numbers of analogue and digital channels
- Software for design modeling (optional)

Frac Pump Remote Controls

Trailer Mounted Data Van with Slide-Out

- Satellite communication system (optional)
- Storage compartments
- Industrial grade computers & monitors
- Wi-Fi communication (optional)
- Pressure, flow, and density measurement devices (optional)
- Remote frac pump controls
- Integrated remote control for blender, hydration unit, chemical additive system and other units
- Emergency shutdown
- Laboratory facility equipment (optional)
- Interior configurations: mobile telephone and facsimile machine, microwave, coffee maker and refrigerator
